Dear Joshua Lederberg:

↓  
It has been quite some time since you contributed to  
the Council for a Livable World.

We miss your participation and support particularly  
in these dangerous times of Reagan-Haig adventurism.

As a long-time supporter you know how effective the  
Council is in furnishing scientific information and  
political support to senators who work for arms control.

We need your help more than ever to stem the drift  
toward nuclear war. Please let us hear from you.

Sincerely,

George Kistiakowsky  
Chairman

P.S. I enclose with my compliments a new printing of  
President Eisenhower's historic Farewell Address.  
Please let me know if you would like additional  
copies.
